

Identity Family

Object View

concrete parts: heads, neurons

inflation risk

Role View

functional roles, multiply realized

components vs. geometry

Mathematical Family

Subspace View

causal subspaces on $\text{Gr}(k, d)$

gauge question

Structural View

gauge orbits, holonomy

state vs. trajectory

Process Family

Process View

formation trajectories

resolution

Stratified View

strata with varying identity

Methodological

Perspectival View

methods as partial projections

method vs. utility

Pragmatic

Instrumental View

useful predictive models, not real objects

*The first six views make metaphysical commitments.
The perspectival and instrumental views are skeptical positions.*
